

“Shake N’ Seal™” FOD-40™
Fiber Optic Drop Splice Closure Kit
(Patent Pending)

- ◆ Compact design
- ◆ 100% water tight seal
- ◆ Permanent splice protection
- ◆ Use with 1 or 2 fibers
- ◆ Use in direct buried applications
- ◆ No flame or torch needed
- ◆ Excellent pull out strength
- ◆ Easy to install
- ◆ RUS Listed

The **NEW** “Shake N’ Seal” FOD-40™ Kits are specifically designed for fiber applications. Uraseal’s FOD-40™ kit protects your fusion splice from moisture and helps to eliminate cable deterioration and other related problems that can lead to signal loss and cable failure. Uraseal’s “Shake N’ Seal” technology is ideally suited for direct burial applications or equivalent by providing a **permanent water tight seal**. The kit **replaces the sheath integrity** with a permanent seal around the splice or damaged cable. The kit can be used for adding a length of fiber to a run, or building a branch splice.

The FOD-40™ kits are designed to **quickly and permanently encapsulate** 1 or 2 fibers. They are the perfect **protection in wet or damp areas** because they provide a 100% water tight seal. The kits also provide excellent pull-out strength in freeze—thaw situations as well as in high heat environments where expansion / contraction is an issue. The kits are safe and easy to use and **do not require the use of a torch or flame**. Shake N’Seal™ technology is now available for optical fiber applications.
